Subject: [EXT] FW: GOLi CTL Burner Technology
Importance: High

Jeff,

I looked in you parts catalog and saw you have similar products.

Can you put together an analysis vs the attached of what you provide, please. I am not sure of the price of the attached, but the warranty, universal application and most importantly the fire protection is attractive.

Let me know.

Thanks

Chad Wood · Executive Vice President

Hi Keith: Please consider the following questions for your various properties:

1. **Are some of your apartment kitchens equipped with coil-type electric ranges?**
2. **Do your residents complain about cooking performance?**
3. **Are you in favor of preventing stovetop cooking fires?**
4. **Have you experienced stovetop cooking fires?**
5. **Do you have stoves without *UL858 60A fire prevention protection from cooking fires?**
6. **Is electrical energy conservation a corporate goal?**

My experience over the last 15+ years has been in the field of home fire-safety. During these last 15 years in cooking-fire safety, I have always tried to stay at the forefront of technology changes.

GOLi Electric has developed the best and most non-intrusive solution I've seen yet for preventing unattended cooking fires on coil-element electric stoves. We make a universal-fit replacement coil burner that is designed to outlast every other burner on the market.

- **Universal Fit – Only one 6" or 8" SKU for all your coil-element stoves**

GOLi Email to Richman Management

- Long Lasting – GOLi CTL is designed to last hundreds of thousands of “On/Off” cycles, longer than all other entries
- Performance - GOLi CTL replacement burners vastly improve the cooking experience. Other stoves or burners may be UL858 60A compliant (thus qualifying for fire insurance premium discounts), but virtually all of them suffer from poor cooking performance
- Low Price – GOLi burners currently sell for less than \$145.00/set of 4 delivered
- Fire Prevention – GOLi burners ELIMINATE unattended cooking fires. Period.
- Energy - GOLi reduces electrical energy costs by 25-30% per stove per year. (confirmed by Intertek, NRTL, independent study)
- Warranty – Industry leading 2-years.

GOLi CTL “no charge” trial sets are available. All I would need is the UPS delivery address, point of contact info and the configurations need (2X2 or 3X1).

* UL858-60A requires that electric ranges and cooktops with coil burners made after April 2019 pass a new cooking oil ignition test. A few after-market, replacement burners also meet this new standard.

Thank you!

Bill
